Provide an up to one-page abstract that succinctly and clearly describes your new transport physics results. This exact template format is not required, but limit to one page, 1" top, bottom, right, left margins. Use 12-point font for main text. A figure may be included so long as it fits on single page. Submit in PDF format. Optional references after text/figures and acknowledgement statement should be included at end. Please select a working group topic to which you'd like to submit your abstract and request oral or poster presentation. If desired, also select one of the focus topics for your abstract to be considered for a plenary or affiliated oral contribution.

Thank you for your contribution to the 2023 US Transport Task Force Workshop.
